(b) (6) - Roger all and had already captured most of the below. Thanks! We need to get to the "what is the intent" of all this, once we do, the determination to make ALGUITA a COI can be made.

(b) (6) – Yes, please have any updated info on ALGUITA sent me, LT (b) (6), and LCDR (b) (6) (cc'd). Unfortunately, the I&W watch does not have a group account.

Thanks again and let me know if you have questions or concerns.

Subject: FW: ORV ALGUITA

Gents,

Regarding the 14-15 Jul UAS' incident IVO USS KIDD and M/V BASS STRAIT. On Friday 19 Jul, USCG contacted the master of the ORV ALGUITA who subsequently provided the following information: ALGUITA has the Phantom IV UAS aboard. Their UAS's can only operate a very short distance from the ship (5-10 ft.) and they've been having difficulty operating them. It is unknown whether they were flying on the days in question. The master also related they didn't see a US warship during the time period in question.. The SUPPLOT team is verifying the ALGUITA track, but a quick look does put them in the area.

According to unclas sources, the ALGUITA has been contracted to document the Pacific Gyre.

According to Phantom IV (drone) homepage, it has a 4.3 mile range and has a max speed of 45 mph (that could explain the UAS reporting as passing our ships at "40 kts."

Our USCG staff officer LCDR (b) (6) reached out to his counterparts yesterday; they are tracking the ALGUITA and will provide track info. Where would you like updates to be sent (BWC/FIWO/other)? Are we going to designate ALGUITA a contact of interest?

Standing by for rudder orders.

Regards

(b) (6)

(b) (6)
